# LEVEL 3 CERTIFICATE Mathematical Studies 

1350/1 Paper 1<br>Mark scheme

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk.

## Glossary for Mark Schemes

Examinations are marked in such a way as to award positive achievement wherever possible. Thus, for mathematics papers, marks are awarded under various categories.
If a student uses a method which is not explicitly covered by the mark scheme the same principles of marking should be applied. Credit should be given to any valid methods. Examiners should seek advice from their senior examiner if in any doubt.

| M | mark is for method |
| :--- | :--- |
| dM | mark is dependent on one or more M marks and is for method |
| A | mark is dependent on M or m marks and is for accuracy <br> accuracy |
| B | mark is for explanation |
| E | follow through from previous incorrect result |
| ft | correct answer only |
| CAO | correct solution only |
| CSO | anything which falls within |
| AWFW | any correct form is for method and |
| AWRT | answer given |
| ACF | special case |
| AG | or equivalent |
| SC | 2 or 1 (or 0) accuracy marks |
| OE | possibly implied |
| A2,1 | substantially correct approach |
| PI | candidate |
| SCA | significant figure(s) |
| c | decimal place(s) |
| sf |  |
| dp |  |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
| 1a | discrete and quantitative | B2 | B1 for 1 correct word if only one word circled <br> or <br> B1 for both correct words and one other circled <br> or <br> B1 for one correct word and at most one incorrect word circled |
| 1b | Lowest 50 and highest 99 | B1 |  |
|  | Lower quartile 65 | B1 |  |
|  | Median 75 | B1 |  |
|  | Upper quartile 82 | B1 |  |

|  | Both fully completed box plots drawn <br> accurately with at least one labelled | $\pm 1 / 2$ sq <br> ft their values for Paper 2 <br> B2 One fully completed box plot drawn <br> accurately and labelled or both box plots <br> correct but no labels <br> B1 one box plot fully correct with no label <br> or <br> both boxes (median and quartiles box) <br> correctly drawn (no label needed) |
| :---: | :--- | :--- | :--- |
|  | Additional Guidance  <br>  Ignore whiskers extended into box <br> Whiskers do not need end lines <br> Any height of box is allowed <br> If boxes overlap mark to scheme if clear which is which |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

|  | Comparing equivalent values <br> median, IQR/width of box, range, both <br> quartiles, lowest value, highest value, <br> particular parts of distribution <br> Eg On Paper 2 there were more <br> students who got 90+ <br> On Paper 2 nobody got under 50 <br> marks but on Paper 1 one person did <br> On Paper 1 there were fewer <br> students who got under 70 marks <br> The average was higher on Paper 2 | M1 | ft correct conclusion for their Paper 2 <br> median |
| :---: | :--- | :--- | :--- |
| 1d | If they do not draw both boxes then they <br> must show values for IQR and/or range |  |  |
| compares median in context <br> eg the median was higher on Paper 2 <br> so on average they did better on <br> Paper 2 <br> eg the average mark was higher on <br> Paper 2 so they did better on this <br> paper | A1ft | ft correct conclusion for their medians |  |

## Additional Guidance

Only award A marks for comparison of median and IQR in context.
For the comparison of spread they must mention the word consistent or variation in results/more varied etc
Eg 1 Paper 2 had a higher median M1 AOAO
Eg 2 The box was wider on paper 2 so the marks on Paper 1 were more consistent M1A1
Eg 3 The median was higher on Paper 2 so on average they did better on Paper 2. They were more consistent on Paper 1. M1A1A0 (no evidence to back up consistent)

Eg 4 The median was higher on Paper 2 so on average they did better on Paper 2. The smaller IQR on Paper 1 shows they were more consistent on Paper 1. M1A1A1

Eg 5 They had a better success rate on paper 2 as the median was higher M1A1
Eg 6 There was a wider range of marks on Paper 2 M1A0A0

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

## Alternative method 1

| $22.5(0) \times 1.2$ |  | oe |
| :--- | :--- | :--- |
| or |  |  |
| $\frac{20}{100} \times 22.5(0)+22.5$ | M1 |  |
| or |  |  |
| $10 \%$ of $22.5(0)=2.25$ |  |  |
| and |  |  |
| $2.25 \times 2+22.5$ |  |  |
| or |  |  |
| 27 seen | M1 | oe |
| their $27 \div 0.9$ | A1 | Not 30\% |
| 30 | SC1 29.70 |  |

## Alternative method 2

| $0.9 \div 1.2$ or 0.75 | M1 | or $1.2 \div 0.9$ or $1.33 \ldots$ |
| :--- | :---: | :--- |
| $22.5(0) \div$ their 0.75 | M1 | $22.5(0) \times$ their $1.33 \ldots$ |
| 30 | A1 | Not $30 \%$ |
| Additional Guidance |  |  |
| If 1.3 is seen do not assume it is from $1.2 \div 0.9$. It is more likely to be from adding $10 \%$ and <br> $20 \%$. In this case $22.5(0) \times 1.3=29.25$ is M0 |  |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 3 a | Assumes an amount per day/week/month | B1 | Allow any realistic value eg 0.5 (kg) per day <br> 3 (portions) per day <br> 2 (pieces of) fruit and veg per day <br> 3 (kg) per week <br> Allow splitting into fruit and veg separately if combined later or summer/ winter etc |
| :---: | :---: | :---: | :---: |
|  | their value per day $\times 365$ or their value per week $\times 52$ or their value per month $\times 12$ | M1 | Allow 4 weeks in a month <br> Allow rounding of 365 and 52 if explained <br> Allow splitting into different parts of a year but must total a whole year |
|  | Calculates accurate answer based on their assumed amount of fruit and veg per day/week/month with units used stated | A2 | A1 Calculates accurate answer based on their assumed amount of fruit and veg per day/week/month with incorrect or no units used stated <br> Condone units missed off the answer line if they are seen with the total amount of fruit and veg in the body of the script or <br> A1 Calculate accurate answer based on their assumed amount of just fruit or just veg with units stated <br> Eg 1 apple a day $\times 365=365$ BOM1AOAO <br> Eg 1 apple a day $\times 365=365$ apples B0M1A0A1 |

## Additional Guidance

If they only mention fruit or only mention veg then max 2 marks are available
Time periods must be correct
eg 6 portions per week $\times 365=2190$ portions per year gains M1MOAOA0
If they extend to longer than a year eg a lifespan, they can achieve M1M1A1A0 for an accurate answer with units

| Q | Answer | Mark | Comments |
| :---: | :--- | :---: | :--- |
| 3b | States one refinement <br> eg <br> Count the portions of fruit and veg one <br> day <br> Weigh the amount of fruit/veg for a <br> week <br> Carry out a survey to find out how <br> much fruit and veg people eat <br> Consider times when you might eat <br> more fruit eg on holiday | B1 | B0 for <br> split into fruit and veg separately <br> Do a survey <br> Work out the exact amount an average <br> person eats <br> Record all the fruit and veg people eat for <br> a year |

| Q Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| $\mathbf{4 a}$ | Full explanation <br> eg <br> Yes as it takes the sample in <br> proportion to the number of girls and <br> boys <br> or <br> Yes as there are more girls than boys <br> in year 12 so the sample will have <br> more girls than boys <br> or <br> Yes as it is (more) representative of <br> the number of girls and boys <br> or <br> Yes as it is representative of the <br> population <br> or <br> Yes as the ratio of girls to boys in the <br> sample is the same as in the year <br> group | B2 <br> eg |
| :--- | :--- | :--- | :--- |
|  | Yes as there are more girls than boys <br> Yes as it is more representative |  |
|  | Yes may be implied , eg It is, because..... <br> Answer of No is B0 <br> Reference to not using other year groups is BO |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 4b | Number the girls | B1 | Not 'Number the girls from 1 to 34' |
| :---: | :---: | :---: | :---: |
|  | Use a random number generator/button/ tables | B1 |  |
|  | Use the first 34 different numbers (within the range) <br> or <br> Use the first 34 numbers ignoring repeats | B1 | SC2 Number each girl, put all the numbers in a hat/box etc and pick out 34 oe |
|  | Additional Guidance |  |  |
|  | Put all the girls names in a hat and pick out 34 is B0 |  |  |

| $\mathbf{4 c}$ | Cluster | B1 | Accept convenience |
| :--- | :--- | :--- | :--- |

| Q | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

| Alternative method 1 |  |  |
| :---: | :---: | :---: |
| $\begin{aligned} & 838 \times 0.88 \text { or } 737.44 \\ & \text { or } \\ & 838 \times 0.12 \text { or } 100.56 \\ & \text { and } 838-\text { their } 100.56 \end{aligned}$ | M1 | oe <br> Full attempt to get to $88 \%$ |
| $\begin{aligned} & \text { (their } 737.44-250) \times \frac{2}{3} \\ & \text { or } 487.44 \times \frac{2}{3} \\ & \text { or } 324.96 \end{aligned}$ | M1 |  |
| $\begin{aligned} & 2173 \div \text { their } 324.96 \text { or } 6.6(\ldots) \\ & \text { or } \\ & 7 \times \text { their } 324.96 \text { or } 2274 .(72) \end{aligned}$ | M1 | dep on 1st or 2nd M1 awarded |
| 6.6(...) and Yes or 7 and Yes or 2274.(72) and Yes | A1 | Yes can be implied eg 2274.(72)> 2173 Allow 2275 |
| Alternative method 2 |  |  |
| $\begin{aligned} & 838 \times 0.88 \text { or } 737.44 \\ & \text { or } \\ & 838 \times 0.12 \text { or } 100.56 \\ & \text { and } 838 \text { - their } 100.56 \end{aligned}$ | M1 | oe <br> Full attempt to get to $88 \%$ |
| (their $737.44-250$ ) $\times \frac{2}{3}$ <br> or $487.44 \times \frac{2}{3}$ <br> or 324.96 | M1 |  |
| $2173 \div 7$ or 310.(43) | M1 |  |
| 324.96 and 310.(43) and Yes | A1 |  |

| :--- | :---: | :---: | :---: |

| 6 | Alternative method 1 |  |  |
| :---: | :---: | :---: | :---: |
|  | $31785+10600$ or 42385 | M1 | Calculating threshold for 40\% tax Condone $31876+10600$ or 42386 |
|  | their 42385-39500 or 2885 | M1 | Calculating extra salary for $20 \%$ tax and $12 \%$ N.I |
|  | 43500-42385 or 1115 | M1 | Calculating amount charged at 40\% tax and $2 \%$ N.I |
|  | their $2885 \times 0.2+$ their $1115 \times 0.4$ or $577+446$ or 1023 | M1 | Tax Allow 577.20 from 31876 used |
|  | their $2885 \times 0.12+$ their $1115 \times$ 0.02 <br> or 346.2(0) $+22.3(0)$ or 368.5(0) | M1 | N.I <br> Allow 346.32 from 31876 used |
|  | ( $£$ )1023 and ( $£$ )368.5(0) <br> or $(£) 1023.20$ and ( $£$ )368.62 <br> or ( $£$ )1391.5(0) or ( $£$ )1391.82 | A1 | extra tax and extra N.I. |
|  | $\begin{aligned} & (43500-39500)-\text { their } 1023- \\ & \text { their } 368.5(0) \\ & \text { or } \\ & \begin{array}{ll} (£) 2608.50 \text { or } & (£) 2608.18 \end{array} \end{aligned}$ | M1 | $\begin{aligned} & \text { or their } 1023+\text { their } 368.5(0)+12 \times \\ & 150 \\ & \text { or } \\ & 3191.5(0) \text { or } 3191.82 \end{aligned}$ |
|  | $\begin{aligned} & \text { their }(£) 2608.5(0) \div 12 \\ & \text { or } \\ & \text { their }(£) 2608.18 \div 12 \end{aligned}$ | M1 | $43500-39500$ or 4000 |
|  | 217.(..) per month and Yes or 67 extra or $150 \times 12=1800$ and 2608.5(0) and Yes or 4000 and 3191.(50) and Yes or 4000 and 3191.(82) and Yes | A1ft | ft their increase in net pay per month/year compared with travel costs per month/year |

## Additional Guidance

Allow use of 31785 or 31786 for upper tax limit
Ignoring higher tax limit and taxing all at 20\% can gain max 7 marks (loses 4th M1 and 1st A1)
Ignoring higher NI or only needing to use $12 \%$ can gain max 7 marks (loses 5th M1 and 1st A1)

Ignoring both higher limits can gain max 6 marks
For premature rounding allow all method marks
1023 or $577+446$ implies the first 4 method marks
$368.5(0)$ or $346.2(0)+22.3(0)$ implies first 3 and 5th method marks

| Alternative method 1 |  |  |
| :---: | :---: | :---: |
| Makes an assumption for average number of people in 3 or 4 bedroom homes <br> eg 3 or 4 bedroom family homes average 4 people per home or <br> Makes an assumption for average number of people in 1 or 2 bedroom homes <br> eg 1 or 2 bedroom homes average 2 people per home | B1 |  |
| Uses [134,191] (cubic metres) for the family homes | B1 |  |
| Uses [54,134] (cubic metres) for the 1 or 2 bedroom homes | B1 |  |
| $240 \times$ their usage for 3 or 4 bed homes eg <br> $240 \times 164$ or 39360 or approx. $39000$ | M1 | Allow any rounded or unrounded answer eg $240 \times 164$ is approx. 40000 or 39500 |
| $80 \times$ their usage for 1 or 2 bed homes eg $80 \times 101$ or 8080 or approx. 8000 | M1 | Allow any rounded or unrounded answer |
| $30 \times 54$ or 1620 or approx. 1600 | M1 | water usage for retirement flats must use 54 for annual use or per day [145, 150] litres or [0.14, 0.15] cubic metres <br> Allow rounding to 1 or 2 sf |
| their 40000 + their 1600 + their 9000 | M1 | sum of their 3 rounded or unrounded answers |
| Correct answer for their values | A1 | All method marks must be scored |
| their answer $\div 365(\times 1000)$ or their answer $\div 52 \div 7(\times 1000)$ | M1 | Condone $\div 12 \div 31$ |
| Correct division of their total per year to give value per day and conversion to litres | A1 | Must convert to litres <br> Penalise decimal answers |

| 9 | Alternative method 2-working on daily values |  |  |
| :---: | :---: | :---: | :---: |
|  | Makes an assumption for average number of people in 3 or 4 bedroom homes <br> eg 3 or 4 bedroom family homes average 4 people per home or <br> Makes an assumption for average number of people in 1 or 2 bedroom homes <br> eg 1 or 2 bedroom homes average 2 people per home | B1 |  |
|  | Any water usage $\div 365$ ( $\times 1000$ ) | B1 | Implied by figures within the ranges of the values used for each size of home |
|  | For the 3-4 bed homes, uses [360,530] litres or [0.36, 0.53] cubic metres | B1 |  |
|  | For the 1 or 2 bedroom homes, uses [145, 360] litres or [0.145, 0.36] | B1 |  |
|  | $240 \times$ their usage for 3 or 4 bed homes <br> eg <br> $240 \times 450$ or 108000 or approx. <br> 110000 | M1 | Allow any rounded or unrounded answer Allow rounding to 1 or 2 sf |
|  | $80 \times$ their usage for 1 or 2 bed homes eg $80 \times 367$ or 29360 or approx. 29000 | M1 | Allow any rounded or unrounded answer eg $80 \times 0.367=29.36$ or 29.4 or 29 or 30 Allow rounding to 1 or 2 sf |
|  | $30 \times 148$ or 4440 or approx. 4500 or $30 \times 0.148$ or 4.44 or approx. 4.5 | M1 | Water usage for retirement flats per day [145,150] litres or [0.14,0.15] cubic metres <br> Allow rounding to 1 or 2 sf |
|  | their $110000+$ their $29000+$ their 4500 | M1 | Sum of their 3 rounded or unrounded answers |
|  | Correct answer for their values (in litres or cubic metres) | A1 | All method marks must be scored |
|  | Answer given with correct evaluations of division by 365 (changing to per day) seen earlier | A1 | Penalise decimal answers |

## Additional Guidance

All values can be rounded at any point.
Example for final mark
138000 given as their answer (first A mark)is incorrect A0
In their working they divided their water usages correctly by 365
Their answer is in litres and no decimals so final A1 is awarded
(Note the M1 for dividing water usage by 365 is for one seen-whereas the A1ft is for dividing all water usages accurately)
